Venue: China Import & Export Fair Complex, Guangzhou, China

Gulf's Energy Investments

The outlook for the GCC economy improved significantly in H1 2022. Energy prices are driving a rapid economic recovery in the region with most states forecast to achieve significant fiscal surplus by the end of the year.

The invasion in Ukraine resulted in the surge in oil and gas prices and had a radical impact on the fiscal outlook for oil-exporting countries. The improvement in the GCC's economic and fiscal outlook encourages the investment in projects.

The IMF's latest forecasts see a 5% spending increase in 2022, driven by Qatar and the UAE, while Saudi Arabia and Oman, are both showing modest 4% year-on-year increases in expenditure.

The total planned and committed energy investments in MENA is expected to increase by 9% to exceed \$879 billion over the next five years, says a report by the Arab Petroleum Investments Corporation (Apicorp). Saudi Arabia leads the region in energy investments.

The energy investment shows that the GCC continues to progress the transformation from global oil and gas suppliers to energy transition leaders by diversifying into other forms of energy. Decarbonization, renewables and clean energy are part of its long-term strategic vision now.

Governments have set ambitious clean energy targets. About 98 GW of new renewables capacity is planned across the Middle East region with 39 GW due to come on stream by 2025. A number of projects have been proposed for the development of hydrogen production and export. The UAE, Saudi Arabia and Oman have so far been the most aggressive in advancing hydrogen.

The oil and gas sector too is continuing on a rising trend. Amid stronger oil prices, a wave of upstream oil schemes has taken shape.

Governments are backing large-scale investment programmes, and also accelerating efforts to increase private sector participation. The projects' outlook seems brighter going ahead.

► Saudi Aramco's Jafurah Co-generation Project

CLIENT: Saudi Aramco, Saudi Arabia
STATUS: Contractor selected

Saudi Aramco has selected a firm to develop its planned independent steam and power plant (ISPP) at the Jafurah unconventional gas development in the eastern part of the Kingdom.

Kepeco of South Korea has been selected to develop the cogeneration project.

The cogeneration project will be developed on a build-own-operate-transfer (BOOT) basis. It will have a power capacity of 270 MW-320 MW. The project will process a low-pressure (LP) steam demand of 140 thousand pounds an hour (klb/hr) by 2024 and 373 Klb/hr by 2028, and will process high pressure (HP) steam demand of 112 klb/hour by 2024 and 321 Klb/hr by 2028.

Aramco plans to double its gas production to 23 billion cubic feet per day over the coming decade in order to supply gas for power generation, desalination and petrochemicals plants. The Jafurah gas development is part of Aramco's \$3.2bn unconventional resources programme, which aims to develop shale gas in three areas of the kingdom including North Arabia, the South Ghawar and the Jafurah Basin east of Ghawar.

 Fax: 966-3 873-8190

► Adnoc's Asab Onshore Oilfield Development – Phase II

CLIENT: Adnoc Onshore, UAE
STATUS: Subcontractor appointed

Archirodon Construction (Overseas) Company, the main EPC contractor of the project, has appointed China Petroleum Engineering Corporation as the sub-contractor for performing detailed engineering works at the Asab phase 2 project.

Archirodon's scope of work includes boosting the handling capacity of the Asab Central Degassing Station, which serves as the central processing hub for Adnoc Onshore's South East and Haliba fields while allowing the client to support the production evaluation of nearby exploration blocks.

This work further supports the advantage of providing some of the world's most cost-efficient, lower-carbon crude, as Adnoc continues to accelerate towards an oil production capacity of 5 million barrels per day by 2030.

► OQ's Fahud-Sohar Loop Line Project

CLIENT: OQ Gas Networks S.A.O.C., Oman
STATUS: Bids invited

The OQ Gas Networks S.A.O.C. ('OQ') has extended the bids submission

deadline for the EPC Works for 42" Fahud-Sohar Second Loop Line project.

Bids are now due to be submitted by 31 August, 2022.

The pre-qualified bidders include:

- Galfar Engineering and Contracting
- Gulf Petrochemical Services & Trading
- Kalpataru Power Transmission
- Oman Construction Company
- Target Engineering

The contract scope includes construction of a new 42-inch pipeline from Fahud compressor station to Block Valve Station (BVS-06) with a total length of 193 km and Block Valve Station (BVS-04) with the length of 128 km; and connecting the new Loop line to Ibri IPP, ARA and Oxy spur lines

The new pipeline will run parallel to the existing 32-inch Fahud-Sohar Pipeline and will supply gas to the North Power station. The pipelines are a part of the Liwa Plastics Industrial Complex.

The project is scheduled for completion in Q4, 2025.

CONTACT:

► QatarEnergy's North Field Expansion Project – Phase 2

CLIENT: QatarEnergy, Qatar
STATUS: Bids invited

Qatargas has invited bids for the main construction contract of phase 2 of the North Field LNG Expansion Project, called the North Field South Project (NFS), which will increase Qatar's LNG production capacity from 110 Mtpa to 126 Mtpa.

Technical bids are due to be submitted by mid-August, 2022.

The companies that have been pre-qualified to bid are:

- Chiyoda / Technip / Saipem
- CTCI / Hyundai E&C

The project scope involves the construction of 2 LNG trains, an LNG storage tank, a helium recovery unit, a non-technical building, off-plot facilities, 5 well-head platforms, pipelines and jackets.

The project is being managed and operated by Qatargas, which has been entrusted to execute this mega-project on behalf of QatarEnergy, formerly called Qatar Petroleum (QP).

 Fax: 974 4483 1125

► Saudi Aramco's Haradh Oil and Gas Field Development

CLIENT: Saudi Aramco, Saudi Arabia

STATUS: FEED contract awarded

Saudi Aramco has awarded the FEED contract to the joint venture of KBR of US and Abdulhadi & Al-Moaibed Consulting Engineering Company of Saudi Arabia for the Haradh oil and gas field development in the Eastern Province of Saudi Arabia.

The contract scope covers pre-front-end engineering and design (pre-FEED) and FEED works on the project.

The project aims to increase gas production from the Haradh hydrocarbon field development, as well as build a new gas-oil separation plant (GOSP) at Haradh.

► KOC's East Kuwait Gas and Condensate Network Upgrade Project

CLIENT: Kuwait Oil Company (KOC), Kuwait

STATUS: Bids invited

The Kuwait Oil Company (KOC) has invited bids for the upgradation of gas and condensate network at East Kuwait Area – II.

Last date to submit bids is 30 August, 2022.

This is the second upgrade project for the gas and condensate network in this region.

The contract is estimated to be worth about \$140 million.

CONTACT:

Kuwait Oil Company (K.S.C.)
P.O. Box 9758, Ahmadi
61008 Ahmadi, Kuwait

Phone: 00965 – 23989111 / 23865250 / 23865251

Fax: 00965 – 2398366 / 2398 0429

► Taziz' Ruwais Petrochemical Complex – Cogeneration Plant

CLIENT: Taziz, UAE

STATUS: Bids submitted

Taziz, a joint venture of Adnoc and ADQ, has received bids for the Cogeneration Plant to be built in the petrochemical complex of Ruwais.

The bidders are understood to include:

- Al-Ghanim International
- Doosan Heavy Industries & Construction
- Elsewedy Electric
- Hyundai Engineering & Construction
- PowerChina
- Samsung C&T
- Samsung Engineering
- Sepco 3

The planned 200 MW steam and power facility will supply electricity to the different plants to be built in the complex.

The petchem project scope involves the construction of chlor-alkali, ethylene dichloride, methanol, ammonia, isopropyl alcohol, and elastomers production plants, alongwith the construction of port facilities, infrastructure works and associated facilities.

CONTACT:

Abu Dhabi National Oil Company (Adnoc)
PO Box: 898
Abu Dhabi, UAE

Phone: +971 2 6020000

Fax: +971 2 6023389

► PetroChina's Halfaya CPF-2 Water Treatment Project

CLIENT: PetroChina Halfaya, Iraq

STATUS: EPCC bids invited

The NTPC Renewable Energy (NTPC Renewables), a wholly-owned subsidiary The PetroChina Halfaya has invited bids for the provision of engineering, procurement, construction, commissioning (EPCC) of Central Aquifer Water Treatment Plant Stage-1 in CPF2 project.

Last date to submit bids is 4 August, 2022.

The contract scope involves:

- Buffer facilities with capacity 500,000 BWPD including but not limited to injection tanks, chemical injection skid, etc.
- Utilities system include piping, power supply, instrument and etc.
- Relevant Building, Road, Paving, Fence and etc.
- Tie-in and reserve for future facilities.
- Aquifer water gathering pipeline and distribution pipeline: the interface is 20m from CPF2 security fence outside to Central Aquifer Water Treatment Plant Stage1 in CPF2.

CONTACT:

PetroChina Halfaya Base Camp,
Kahlaa, Missan Governorate

Phone: +971 4 4404100

Fax: +971 4 4404190

Email: halfaya-quotation@petrochina-hfy.com

► NTPC's India Solar Power Projects

CLIENT: NTPC, India

STATUS: Bids invited

The NTPC has invited bids to enlist vendors for the operation and maintenance (O&M) of solar power projects up to 50 MW.

Last date to submit bids is 11 August, 2022.

The contract scope includes operation, maintenance and housekeeping of the entire solar project.

The successful vendor should take care of the breakdown maintenance, preventive maintenance, and overhauls.

CONTACT:

NTPC Bhawan,
SCOPE Complex, Institutional Area, Lodhi Road,
New Delhi – 110003

Phone: 91 11 24360100, 24387000, 24387001

Fax: 91 11 24361018

Aramco Plans to Invest in 12 GW Renewable Energy by 2030

Saudi Aramco's plan to invest in 12,000 MW of renewable energy by 2030 entailing an investment in the kingdom's national renewable energy programme as well as through affiliate investments in renewables and purchase of renewable energy certificates.

It is also expected that the oil giant will expand off-grid and grid-connected solar and wind energy solutions as an important source of low-carbon energy for its operations, similar to its adoption of cogeneration facilities to boost energy efficiency.

Saudi Aramco Power Company (Sapco), subsidiary of the oil giant, owns a 30 percent stake in the special purpose vehicle (SPV) that is implementing the 1,500 MW Sudair solar photovoltaic (PV) scheme in Saudi Arabia.

It is expected that Sapco will own shares in future renewable energy projects being developed by the PIF as part of the kingdom's goal to develop 58,700 MW of renewable capacity by 2030.

Investments in renewables by affiliates Motiva, Arlanxco and Saudi Aramco Jubail Refinery (Sasref) will also contribute to Aramco's overall goal of meeting its 12,000 MW renewable energy commitment by 2030. ■

Dewa Launches ME's First Automatic Grid Restoration System

Dubai Electricity and Water Authority (Dewa) announced that it has launched the Middle East's first-ever Automatic Smart Grid Restoration System (ASGR) to increase the control, management, and monitoring of its power network.

The system, which works 24x7 without human intervention, uses an innovative central system that locates the fault in the power network, isolates it, and automatically restores the service, the DFM-listed utility said in a press statement.

It said ASGR improves grid automation, fault detection and retrieval of connections.

Dewa's MD and CEO Saeed Mohammed Al Tayer said the utility is investing up to 7 billion UAE dirhams between 2021 and 2035 as part of its Smart Grid Strategy, adding that Dewa's adoption of the latest technologies in power generation, transmission and distribution, has placed

it among the best utilities worldwide.

"In 2021, Dewa achieved a new world record in electricity Customer Minutes Lost (CML) per year. Dubai recorded 1.43 minutes per customer, compared to around 15 minutes by leading utility companies in the European Union. This highlights Dewa's ability to restore power during faults or unplanned outages. The percentage of losses in the electricity transmission and distribution networks in Dubai was 3.3 percent, compared to 6-7 percent in Europe and the US."

In a previous statement, Dewa had announced that its High-Water Usage Alert to help customers detect leakages in water connections after the meter had saved up to 8 billion gallons of water and saved customers more than 500 million dirhams (\$136 million) up to March 2022.

Hussain Lootah, Executive Vice President of Transmission Power added that the total value of Dewa's planned investments in electricity transmission projects between 2021 and 2024 is 10 billion dirhams (\$2.7 billion). This includes 2 billion dirhams (\$544 million) for 400 kV transmission projects and 8 billion dirhams for 132 kV projects (\$2.3 billion).■

Acciona Deploys Satellites to Study Seawater Quality for SWRO Plants

Spanish infrastructure major Acciona has developed a predictive model for seawater quality that is improving the operation of Sea Water Reverse Osmosis (SWRO) plants in the region.

A leading operator of desalination plants in the Middle East, Acciona said this predictive model uses satellite measurements and Artificial Intelligence tools to forecast the quality of water reaching desalination plants.

Algae bloom, oil spills and jellyfish are just some of the phenomena that can clog the filtering systems of desalination plants and cause operations to shut down. But with sufficient warning, desalination plants can stop extraneous matter from entering filtering systems.

To forecast when desalination plants might be at risk from algae bloom and other events, Acciona used Nasa's Modis Aqua Satellite to collect data from the Persian Gulf from a number of parameters including

water temperature, chlorophyll levels, salinity, and turbidity – a measure of the clarity of water.

An algae bloom is a rapid increase in the population of microscopic algae in freshwater or marine water systems and is often detected by higher concentrations of chlorophyll in the water, which affects its clarity, said the Spanish group in its statement.

The satellite uses different sensors including radar, infrared sensors and high resolution photography to compile the data, it stated.

Acciona's Control Center for its water business, Cechoa, uses the satellite data to model a Turbidity Prediction index, which compares the clarity of the water in real time with historical oceanographic and meteorological data.

When the index exceeds a certain limit, it triggers a warning for operation and maintenance staff to prepare for an algae bloom or similar event, it added.

Guillermo Hijós, Operations and Maintenance Director of Acciona water solutions in the Middle East, said: "With this model, we can forecast the future turbidity of seawater, and this gives our operations teams advance warning of any event that could compromise operations or scheduled maintenance activities."

According to him, Acciona's Turbidity Prediction index can calculate the probability of these event 72 hours in advance. The predictions are updated every hour with data from the Modis Aqua Satellite that is processed by Cechoa's AI neural networks, he stated.

water temperature, chlorophyll levels, salinity, and turbidity – a measure of the clarity of water.

An algae bloom is a rapid increase in the population of microscopic algae in freshwater or marine water systems and is often detected by higher concentrations of chlorophyll in the water, which affects its clarity, said the Spanish group in its statement.

The satellite uses different sensors including radar, infrared sensors and high resolution photography to compile the data, it stated.

Acciona's Control Center for its water business, Cecoa, uses the satellite data to model a Turbidity Prediction index, which compares the clarity of the water in real time with historical oceanographic and meteorological data.

When the index exceeds a certain limit, it triggers a warning for operation and maintenance staff to prepare for an algae bloom or similar event, it added.

Guillermo Hijós, Operations and Maintenance Director of Acciona water solutions in the Middle East, said: "With this model, we can forecast the future turbidity of seawater, and this gives our operations teams advance warning of any event that could compromise operations or scheduled maintenance activities."

According to him, Acciona's Turbidity Prediction index can calculate the probability of these event 72 hours in advance.

The predictions are updated every hour with data from the Modis Aqua Satellite that is processed by Cecoa's AI neural networks, he stated.

Acciona's innovation project was launched in 2020 and has been implemented in SWRO plants in the Middle East.

"We are working to expand the prediction system to other seawater parameters. The system relies on machine learning and other AI tools and the company is working to refine the model's accuracy," he added.■

Siemens Gamesa Appoints New Corporate Affairs Head

Anna Beranek

Siemens Gamesa has appointed Anna Beranek as Head of Corporate Affairs, effective July 1. She will be based in Madrid.

Over the past 12 years, Beranek has worked in multiple corporate communications roles across Siemens, including leading communications for the company's CEO Office.

Siemens, including leading communications for the company's CEO Office.

Most recently, Beranek served as Senior Director, Strategic Communications Lead for Siemens Global Talent and Leadership, where she was responsible for global communications around a wide range of people topics.

For more than 40 years, Siemens Gamesa has been a pioneer and leader in the wind industry, and today its team of more than 26,000 people is working at the heart of the global energy revolution to address the most important challenge of our generation: the climate crisis, said the company in a statement.

With a leading position in onshore, offshore and services, we design, build and deliver powerful and reliable wind energy solutions in close collaboration with our customers, it added.

Lauding the appointment, Siemens Gamesa CEO Jochen Eickholt said: "Having worked with Anna at Siemens' Portfolio Companies and at Siemens Energy, I know that her extensive strategic positioning experience and entrepreneurial mindset will be a great asset for us as we position ourselves as one of the world's renewable energy leaders."

In 2019, Beranek led external and internal communications for Siemens' twelve highly diverse Portfolio Companies, helping their 43,000 employees navigate through an extremely volatile period of major transformation, and ensuring external stakeholders understood the turnaround strategy, he stated.

In 2020, Beranek led communications for the areas under Eickholt's responsibility at Siemens Energy, he added.

ONGC Videsh Names Rajarshi Gupta as New MD

The state-owned Oil and Natural Gas Corporation's overseas investment arm, ONGC Videsh Ltd (OVL), has a new managing director: Rajarshi Gupta (ONGC). He takes over for Alok Gupta, who retired last month.

"Rajarshi Gupta has more than 33 years of varied experience in supervisory, managerial, and strategic planning capacities in domestic and foreign operations of ONGC and ONGC Videsh," the corporation stated in a statement, noting that he assumed his new position on July 19. He formerly served as ONGC's Executive Director and Chief of Corporate Strategy & Planning.

Rajarshi Gupta

He earned his MBA (International Business) with a Gold Medal from the Indian Institute of Foreign Trade and his mechanical engineering degree from NIT Rourkela. From 2006 to 2019, he worked for ONGC Videsh for 13 years, traveling the world to work in business development, merger and acquisition, and project management for exploration and development projects.

"He established the Geological & Geophysical Centre of Excellence in Houston while serving as the country manager and president of ONGC Videsh's US division. Upon his return, he oversaw Strategic HR and Corporate Communications in addition to being the Head of Corporate Planning & Strategy at ONGC Videsh. In ONGC's long-term vision plan, the Perspective Plan 2030, he played a key role in defining the international business vision" it added.

Sandeep Gupta Selected for the Post of CMD, GAIL

Mr. Sandeep Kumar Gupta

The Public enterprises selection board (PESB) selected Mr. Sandeep Kumar Gupta for the post of Chairman & Managing Director, GAIL (India) Limited on June 28, Tuesday. Currently, Sandeep Kumar Gupta is serving as Director (Finance) in Indian Oil Corporation Ltd.

PESB in the selection meeting interviewed nine others apart from him. They are Mr. Rakesh Kumar Jain, Director (Finance), Mr. Rajeev Kumar Singhal, Executive Director, Mr. Ajay Tripathi, Executive Director, Mr. Atul Kumar Tripathi, Executive Director, Mr. Deepak Gupta, Director (Project), from GAIL (India) Limited.

Mr. Manoj Kumar Dubey, Director (Finance), Container Corporation of India Limited (CONCOR), Mr. Suneel Dutt, Executive Director, Airports Authority of India (AAI), Mr. Mahesh Kumar Garg, CTO, Indian Railways Service of Mechanical Engineers, were also interviewed.
