## TEI Partner Events

### **Egypt Petroleum Show - EGYPS 2023**

Date: Feb 13, 2023 - Feb 15, 2023

Venue: Egypt International Exhibition Center, Egypt

### **Gulf Steel Show**

Date: Feb 21, 2023 - Feb 23, 2023

Venue: Dubai, U.A.E.

### **2nd Edition The Arab Green Summit**

Date: Feb 22, 2023 - Feb 23, 2023

Venue : Palazzo Versace Dubai, U.A.E.

### **NOG Energy Week 2023**

Date: Jul 02, 2023 - Jul 06, 2023

Venue: ICC, ABUJA, Nigeria

## Middle East's Projects Outlook

Prospects for the Middle East and North Africa for 2023 has improved despite the slow pace of growth globally, amid the extraordinary economic uncertainties in 2022 with the ongoing Ukraine war, higher and more volatile commodity prices, rising inflationary pressures and a lingering pandemic.

Global growth is forecast to slow from 6 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023, according to the IMF's World Economic Outlook report.

However, the gulf region particularly the GCC, Iraq and Algeria, will continue to benefit from the international energy market developments and are being buffered by elevated energy prices. Also due to the ongoing war, the European countries now look at the region as a source of hydrocarbons to replace Russian energy imports. The Saudi projects market grew by 3.3 percent during the year, adding \$43.1 billion to the GCC projects market.

The total planned and committed energy investments in oil and gas, petrochemicals and power sectors in Mena is expected to increase by 9 percent to exceed \$875 billion over the next five years, says a report by the Arab Petroleum Investments Corporation (Apicorp). Saudi Arabia leads the region in energy investments with planned spending of \$296 billion for the 2023 financial year.

The GCC nations aims to invest heavily to over \$350 billion-plus in upstream and downstream schemes to increase production capacity and diversify into new generation of petrochemical projects to maximize value of the hydrocarbons chain. New policy focus is on conserving hydrocarbons reserves and on reducing greenhouse gas (GHG) emissions. Adoption of digital technologies and In-Country Value requirements are gaining prominence in oil and gas projects.

The region sees growing trends in the power and water sector too as it shifts towards clean energy projects. Alongwith \$30 billion per year of capital spending on major power projects, about 98 GW of new renewables capacity is planned across the Middle East with 39 GW due to come on stream by 2025. A number of projects have been proposed for the development of hydrogen production and export.

In the last two years, more than 45 new hydrogen projects worth \$100 billion-plus have been announced with a total hydrogen production capacity of more than 10 million tonnes a year. The NEOM Helios and the Egyptian Ain Sokhna complex are the two hydrogen projects that are under construction, while remaining are at early stages.

NEOM is the \$500 billion megaproject owned by Saudi Arabia's PIF. It is the flagship project of the Saudi Arabia 2030 Vision aimed at transforming the Kingdom into a tourism and entertainment hub.

All in all, the outlook for the projects market in the region is incredibly strong with abundant new opportunities in the energy industry.

### ► Saudi Aramco's Ras Tanura Refinery Upgrade Project

**CLIENT:** Saudi Aramco, Saudi Arabia  
**STATUS:** Contract awarded

Saudi Aramco has awarded the main contract to the Petroleum & Process Industries (Enppi) of Egypt for a key desulphurization project at its Ras Tanura refinery in Saudi Arabia's Eastern Province.

The contract value is estimated to be around \$350mn.

The front-end engineering and design (FEED) work on the project has been done by Jacobs-ZATE.

The project scope covers modifying three sulphur recovery units: J-72, J-87 and PLT-048. The scope also includes installing a tail gas treatment unit (TGTU) and a sulphur degassing unit, along with building other utilities and associated facilities.

**CONTACT:**  
 Saudi Aramco  
 P.O. Box 5000  
 Dhahran 31311  
 Saudi Arabia

Phone: 966-3 872-0115  
 Fax: 966-3 873-8190

### ► Beeh's UAE Waste-To-Hydrogen Project

**CLIENT:** Beeh Group, UAE  
**STATUS:** MoU signed

Beeh Group of Sharjah has signed a memorandum of understanding (MoU) with Chinook Sciences of UK and Air Water of Japan to produce fuel cell grade hydrogen from waste wood and plastic.

The MoU signed in Japan is a first step to forming a consortium that will advance progress on the Middle East's first waste-to-hydrogen plant, located in Sharjah, and explore further opportunities across the region.

Combining Beeh's expertise in waste management and material recovery, Chinook Sciences patented RODECS pyrolysis and gasification process, and Air Water's Hydrogen Refinement technology, the waste-to-hydrogen plant in Sharjah will transform waste wood and plastic into fuel-cell grade green hydrogen.

The plans for the waste-to-hydrogen plant include an on-site green hydrogen dispensing station capable of fueling several vehicles.

To realize this innovative type of fueling station, the plant will need to produce fuel cell grade hydrogen, which will be made possible with Air Water's Hydrogen Refinement technology.

### ► Neom's Red Sea Coast Water Projects

**CLIENT:** Neom, Saudi Arabia

► **STATUS:** Framework Bridging Agreement signed

ENOWA, Neom's Energy & Water subsidiary, has awarded a Framework Bridging Agreement to Worley for services in the Kingdom of Saudi Arabia.

The services will be executed by Advisian, Worley's consulting business, with support from its Global Integrated Delivery (GID) team and other Worley offices around the globe.

Under the agreement, Worley will provide services for the development of facilities for water treatment, storage and distribution including seawater desalination, brine processing, pilot scale, testing, utility, offsite and storage facilities.

The facilities will be powered by low carbon electricity. The sea water desalination facility is expected to supply up to 2 million cubic meters of desalinated water per day once operational.

As part of the brine processing services, Worley will also provide first-of-its-kind brine beneficiation services to convert brine into saleable products such as gypsum, polyvinyl chloride, salt and magnesium, creating a circular economy from the brine waste. This conversion of brine minimizes environmental impact by ensuring brine is not discharged into the sea, following NEOM's 'zero liquid discharge' commitment.

 P.O. Box 6847, Riyadh 11452  
 Kingdom of Saudi Arabia

### ► Alba's Line 7 Expansion Project

**CLIENT:** Aluminium Bahrain, Bahrain  
**STATUS:** Feasibility study contract awarded

Aluminium Bahrain (Alba), one of the world's largest aluminium smelters, has awarded a contract to conduct the feasibility study to Bechtel for its Line 7 project.

The study will provide a comprehensive evaluation of all factors to determine the viability of the Line 7 Project.

It is estimated that Line 7 Project will have a similar production capacity as Line 6 Expansion Project – within the range of 540,000 metric tonnes per annum.

The study is expected to be completed in about 9 months by September 2023.

### ► OPWP's Power And Water Projects 2024

**CLIENT:** Oman Power and Water Procurement Company SAOC (OPWP), Oman  
**STATUS:** Consultancy bids invited

Oman Power and Water Procurement Company SAOC (OPWP), a member of Nama Group, has invited bids from leading global companies to provide technical consultancy services for the development of "Power And Water Projects 2024".

Last date to submit bids is 9 January, 2023.

OPWP is responsible for procuring new capacity for power and water in the Sultanate of Oman in accordance with the requirements of the law for the regulation and privatization of the electricity and related water sector promulgated by Royal Decree 78/2004 as amended and the OPWP license.

**CONTACT:**

► **SWPC's Jubail 4 & 6 Independent Water Project (IWP)**

**CLIENT:** Saudi Water Partnership Company (SWPC), Saudi Arabia

**STATUS:** EoI invited

Saudi Water Partnership Company (SWPC) has invited expressions of interest (EoIs) for key seawater reverse osmosis (SWRO) desalination water project – Jubail 4 & 6 Independent Water Project – 18 km south of Jubail Industrial City in the kingdom, adjacent to the existing plant units (Jubail Phase 1, Jubail Phase 2, Jubail 3A & 3B).

Last date to submit EoIs is 9 January, 2023.

The Jubail 4 & 6 Independent Water Project, which includes the desalination plant and all associated infrastructure and facilities, will have a total capacity of 600,000 cu m potable water per day.

SWPC will be conducting a competitive tender process to select a private developer/developer consortium that will provide financing, procurement, implementation, operation and maintenance services for the project.

The successful bidder, through a project company to be incorporated, would then develop the plant and sell the entire capacity and output to SWPC under a 25-year concession pursuant to a Water Purchase Agreement.

KPMG Professional Services is the lead and financial advisor; Eversheds Sutherland, (International) the legal advisor and WSP, the technical advisor for the project.

**CONTACT:**

► **Hydrom's Green Hydrogen Projects**

**CLIENT:** Hydrogen Oman (Hydrom), Oman

**STATUS:** RFP issued

Hydrogen Oman (Hydrom) has issued the Request for Proposals (RFP) for the first round of its public auction process to award large-scale integrated green hydrogen projects to developers.

Qualified applicants will now have two months to prepare and submit their bids. The winners for the first round in Duqm will be announced in March 2023.

Hydrom first green hydrogen auction offers up to six plots of land on which it

wants developers to build fully integrated green hydrogen projects — including renewable power supply, electrolyzer capacity and any associated infrastructure required to process the hydrogen into another product, such as ammonia and methanol.

To lead the country's ambitious green hydrogen strategy, the government has established HYDROM, a fully owned autonomous subsidiary of Energy Development Oman SAOC (EDO).

Oman's national hydrogen strategy set a green hydrogen production target of up to 1.23 million tonnes per year by 2030. By 2050 it hopes to be producing up to 8.5 million tonnes per year. In total it will need around \$140bn in investment.

**CONTACT:**

► **KOC's Kuwait Environmental Remediation Project**

**CLIENT:** Kuwait Oil Company (KOC), Kuwait

**STATUS:** Consultancy bids invited

Kuwait Oil Company (KOC) has extended the bids submission deadline for the consultancy contract for Kuwait Environmental Remediation Program (Kerp).

Bids are now due to be submitted by 15 January, 2023.

Companies preparing to bid for the contract include:

- Kent of UK
- Wood Group of UK
- Worley of Australia
- WTE of Germany

The contract scope covers consultancy services in project management and related activities. It will manage crude oil pollution clean-up projects the client had awarded last year.

Kerp is the largest environmental remediation project in the world and was established by the UN Compensation Commission to allow Kuwait to address the ecological damage resulting from the 1990-91 Gulf War.

**CONTACT:**

## Saudi Arabia, Kuwait to Develop Joint Al-Durra Gas Field

The Kuwait Gulf Oil Company (KGOC), a subsidiary of the Kuwait Petroleum Corporation (KPC), has signed a Memorandum of Understanding (MoU) with Saudi Aramco Gulf Operations Company to develop the joint Durra gas field.

Kuwait's Deputy Prime Minister and Minister of Oil Dr. Badr Al-Mulla and Saudi Minister of Energy Prince Abdulaziz bin Salman attended the signing ceremony.

In a press statement, Acting CEO of KGOC Khaled Al-Otaibi said the memo includes procedures to develop the field that are based on implementing the provisions mentioned in the minutes of the ministerial meeting.

The MoU aims to re-assess and complete engineering studies of the field project as well as form a technical team to carry out the scheme, he added.

He indicated that the joint Durra field development program aims to produce one billion cubic feet of natural gas per day and 84,000 barrels of liquefied gas per day.

Initially, the memo was signed on December 24, 2019, between the Kuwait and Saudi Arabia governments, he said. It is also a culmination of the talks held between the two countries' officials on reaching a deal on a direct mechanism, and carrying out and developing the Durra field located in the divided area between the State of Kuwait and the Kingdom of Saudi Arabia, he stated. ■

## Stats Group Wins Big Subsea Pipeline Project Work in Abu Dhabi

UK-based Pipeline technology specialist Stats Group said it has been commissioned by UAE-headquartered oil and gas EPC contractor National Petroleum Construction Company (NPCC) to provide pipeline isolation, hot tapping and plugging services to the world's largest diameter subsea pipeline intervention project, on behalf of a national operating company.

Stats said the project win is the result of its long-term commitment to support localization in the Gulf region. The company employs more than 80 people and has facilities in Abu Dhabi, Muscat and Doha.

The scope of work will include the hot tapping and double block and bleed isolation of multiple pipelines with diameters ranging from 42' up to 56' in the Middle East region, using Stats SureTap hot tapping machines and its patented

BISEP technology.

Mark Gault, Stats Group's General Manager Middle East, said: "We believe this project to be a first in the world. As far as we

aware, there have been no other subsea intervention projects of this complexity or scale that involve subsea isolations on pipelines of 56" diameter."

"We have made a significant product development investment with three new large-diameter hot tapping machines and the associated isolation assets capable of handling this unique work scope. Relatedly, we are delighted to have increased our Bisep DNV Type Approval status up to 56'," he noted.

Ahmed Al Dhaheri, the Chief Executive of NPCC, a subsidiary of National Marine Dredging Company, expressed delight at the new collaboration with Stats Group.

ue to support and enhance our clients' infrastructure to meet the technical, safety and environmental standards required," he stated.

Gault said this was a landmark project for Stats Group and it reinforces the group's credentials for providing innovative subsea hot tapping and high integrity isolation solutions which can address diverse and technical challenges.

"Our strategy of putting in the hard yards in terms of investing in our asset base in the Middle East and in employing and training locally based staff has put us in a strong position to expand further in the region. We are continuing to recruit more staff, not only to support this exciting project with NPCC, but also in response to a broader increase in regional project work following the uncertainties of Covid-related lockdowns," he stated.

NMDC Group CEO Yasser Zaghloul said: "We are committed to developing a robust infrastructure in the EPC sector, which will benefit the industry, the country and our stakeholders."

"We will continue to invest in new critical infrastructure projects, leveraging our rejuvenated skills to meet our clients' needs, and we look forward to broadening our level of collaboration with key industry players like Stats Group to further solidify our position as the EPC major of choice for global NOCs," he added.■

## **SLB Works with Oman on Geothermal Resource Development**

SLB is collaborating with Oman's Ministry of Energy and Minerals and the Oman Investment Authority in building a national strategy to develop the potential of Oman's geothermal resources.

This announcement follows the completion of an extensive project to evaluate data from more than 7,000 oil, gas and water wells, with the objective of mapping sweet spots for geothermal prospects in the country. Commissioned by the Omani authorities, the SLB experts assessed surface, subsurface and well data from the national data repository over a three-month period.

"Geothermal is one of the world's most promising clean energy resources, and it has a crucial role to play in reaching net-zero targets," said Gavin Rennick, president of SLB's New Energy business. "Using digital technology solutions to assess geothermal

installations. We are excited to work with the Ministry of Energy and Minerals and the Oman Investment Authority to explore decarbonization pathways for Oman."

In the initial phase of the collaboration, SLB's GeothermEx multidisciplinary geothermal consulting team used a proprietary AI solution to expedite assessment, sorting, and evaluation of the huge volume of data from the Oman Oil & Gas Data Repository

(OGDR), and delivered a comprehensive assessment of Oman's geothermal potential. The next phase will include assessment of the economic feasibility of the development of potential geothermal resources.

"This collaboration between the Ministry of Energy and Minerals, Oman Investment Authority and SLB is in line with Oman's efforts to decarbonize the energy sector, achieve its Net Zero goal, and implement Oman Vision 2040. Building on existing country data and infrastructure, this collaboration will create opportunities by utilizing the latest technologies in the field of geothermal exploration and ramp up activities in Oman's clean energy stream. We are glad to work with SLB given the extensive global experience in this field," said HE Salim Al Afi, the Omani Minister of Energy and Minerals. ■

## Saudi Arabia Plans 10 New Solar and Wind Energy Projects

OPEC' member Saudi Arabia is planning to execute 10 new renewable energy projects as part of a strategy to boost reliance on solar and wind power and slash oil use in electricity generation.

The world's largest oil exporter approved the 10 projects in its 2023 budget which it announced last week with a surplus for the first time in many years.

"The 2023 budget includes the development of 10 renewable energy projects with a total output capacity of 7 gigawatts," according to a report.

The report did not specify the projects or their costs but said they are part of a strategy in the Kingdom's 2030 Vision for economic diversification aimed at expanding renewable power in the country's energy mix to 50 percent at the end of the scheme.

The Kingdom, which controls the world's second extractable oil deposits after Venezuela, has also set a target to cut diesel consumption in power generation by more than 5,000 barrels per day, the report added. ■

## Mitsui, QatarEnergy Sign Long-term Charter Deal for LNG Carriers

Mitsui O.S.K. Lines, Ltd. has announced that, through a subsidiary, it signed a long-term charter contract for three newbuilding liquefied natural gas (LNG) carriers with QatarEnergy.

The vessels will be built at Hudong-Zhonghua Shipbuilding (Group) Co., Ltd. in China, and are scheduled for delivery in 2027. MOL signed a long-term charter contract with QatarEnergy in April 2022 for four newbuilding LNG carriers, and the relationship between QatarEnergy and MOL will be further expanded by three LNG carriers through the latest contract.

QatarEnergy is undertaking the North Field Expansion Project to increase its LNG production capacity to 126 million tons per annum by 2027.

MOL, through its further participation in LNG projects in Qatar, will contribute to stable global LNG supply and enhance the maritime transport of the next-generation, environment-friendly energy resources, statement mentioned. ■

## Siemens Gamesa Appoints Bruch as New Chairman

Christian Bruch

Siemens Gamesa, a leader in renewable energy, has announced the appointment of Christian Bruch as its new chairman replacing Miguel Ángel López, who has chosen to embark on a new chapter in his professional career.

Announcing on November 17, Siemens Gamesa said its board of directors has appointed Christian Bruch, President and

Chief Executive Officer of Siemens Energy AG and member of Siemens Gamesa's Board of Directors, as its new non-executive Chairman.

Born in 1970 in Düsseldorf, Germany, Bruch holds a doctorate in engineering from the Swiss Institute of Technology Zurich (ETH), Switzerland. He studied mechanical engineering at the Leibniz Universität Hannover, Germany, and at the University of Strathclyde, Glasgow, United Kingdom.

His long professional career encompasses the engineering and energy industries. Before becoming the President and CEO of Siemens Energy AG in 2020, he held senior positions in companies such as Linde AG or RWE AG.

"The medium- and long-term success potential of Siemens Gamesa is enormous. Without wind there can be no energy transition. Structurally some things have to change in the wind market so that turbine manufacturers can be profitable, but above all we have to get a grip on our home-grown problems," said Bruch following the appointment.

"First and foremost, this requires passion and attention to detail, which is what I expect from management and employees. We have to tackle the problems step by step and show progress quarter by quarter. In my new role, I will do everything I can to support the Siemens Gamesa Executive Committee in this task. I would like to thank López for his dedicated commitment to Siemens Gamesa in difficult times and for the good cooperation. I wish him all the best for his future," he added.

## Arun Kumar Singh Appointed as ONGC Chairman and MD

Arun Kumar Singh, former Chairman of oil refining and marketing company BPCL, is appointed Chairman and Managing Director of ONGC on December 7. It is the first instance when a retired person being appointed the head of a Maharatna PSU.

"The Appointments Committee of Cabinet (ACC) has approved the proposal of Ministry of Petroleum and Natural Gas for appointment of Arun Kumar Singh, ex-CMD, BPCL as Chairman, ONGC for a three-year tenure with effect from the date of his assumption of charge of the post," an official order said.

Singh's appointment was first reported on November 17. Oil and Natural Gas Corporation (ONGC) is India's top oil and gas producer.

Arun Kumar Singh

A search-cum-selection committee, constituted by the oil ministry, zeroed in on Singh after interviewing six candidates on August 27.

A mechanical engineer from National Institute of Technology, Patna, Singh was Director (Marketing) of Bharat Petroleum Corporation Ltd (BPCL) from October 2018 to September 2021, after which he was elevated as Chairman and Managing Director of the company.

Singh retired as BPCL head 13 months later in October 2022.

## PESB Selects Gopalan as the Next CMD of BPCL

Krishnakumar Gopalan

Mumbai headquartered company.

The Public Enterprises Selection Board (PESB) has picked Krishnakumar Gopalan for the post of Chairman and Managing Director (CMD) at India's second largest oil refining and marketing company Bharat Petroleum Corporation Ltd (BPCL), the government's head-hunter said on its website.

Krishnakumar is currently an Executive Director (other units) at the

An electrical and electronics engineering graduate from the National Institute of Technology, Tiruchirapalli and a post-graduate in finance management from the Jannalal Bajaj Institute of Management Studies, Krishnakumar joined BPCL as a management trainee in April 1987.

Krishnakumar was a Senior Manager (Loyalty Programmes), Deputy General Manager (Learning and Development), Chief General Manager (Marketing), Lubricants, Chief General Manager, HRD, Executive Director, HRD and Executive Director, Lubricants.

Krishnakumar was selected during interviews held on December 12 from a shortlist of six candidates, all from BPCL. The PESB selection will have to be ratified by the Appointments Committee of the Cabinet (ACC).
