Iraq's Project Outlook

The Iraqi oil industry plays an important role in shaping the future of the national economy. The Federal Iraq and Kurdistan Regional Government is the second-largest crude oil producer in OPEC after Saudi Arabia and the sixth-largest total petroleum liquids producer in the world.

Iraq has the fifth-biggest oil reserves in the world with 147 billion barrels of proven reserves, equal to 17% of the Middle East and 8% of the world's oil. The country delivered steady oil production in 2023 with annual average of up to 4.6 million barrels per day (mbpd). Now it is close to reaching an extraction capacity of up to 5 mbpd.

Crude oil export revenues account for a large part of Iraq's economy. Most of country's crude oil is located in the southern Basra region, the Diyala region east of Baghdad, and the northeastern Kirkuk region. Most of the fields are producing or are in development.

Iraq is steadily expanding its energy sector with over \$126bn of major projects underway in the oil, gas, chemical and power sectors.

Iraq's current gas production reaches 3,200 million standard cubic feet (scf) per day, while some 18 billion cubic meters (bcm) of gas annually is burned in a wasteful process known as flaring, which is one major cause of global climate change.

The country is making a significant progress in its quest to capture more of the associated gas that is produced along with crude oil. The Iraqi government is accelerating work to implement an optimal investment plans for gas wealth that aims to maximize national production, stop burning gas, and transform it into useful energy to supply and meet the needs of the electricity sector and industries related to its consumption.

The ministry is establishing projects to invest 900 million scf of gas in Dhi Qar, Basra, and Maysan, in addition to another 600 million through the French company TotalEnergies.

In the power sector, Iraq has drawn up plans for over \$80bn investment to face a rapid growth in domestic demand due to economic expansion and a steady population increase. The country is encouraging the private sector to contribute to power projects.

Iraq has awarded solar power projects with a total capacity of around 7.5 GW to foreign firms and intends to offer more such projects within plans to reduce reliance on traditional power sources. The Iraqi government has declared its intention to revive the country's long-abandoned nuclear energy program.

Last year, the Government of Iraq and TotalEnergies have signed a landmark mega-energy agreement involving four projects worth an estimated \$27bn. The deal aims to increase oil production as well as boost Iraq's capacity to use gas and renewables.

With its huge oil and gas wealth, Iraq is undoubtedly one of the largest projects markets in the region. Though, beset by its geopolitical and financial challenges, direct foreign funding is providing a much necessary boost for the projects to proceed.

TEI Editorial

Projects

NEOM Development Project

CLIENT: Public Investment Fund (PIF), Saudi Arabia

STATUS: EPC bids invites

Enowa, a fully owned subsidiary of Neom, has invited bids for the engineering, procurement, construction (EPC) and operations and maintenance (O&M) services contract to build the first phase of the Duba Energy Park in Tabuk.

Last date for bid submission is 26 May, 2024.

The project site is located northwest of the existing Duba Energy Park.

Two power stations are set to be developed at Duba Energy Park. The first phase comprises a 300 MW transportable gas turbine generator (GTG) designed to deliver emergency power to Neom. The second phase is a permanently installed 500 MW facility comprising heavy-duty GTGs.

Both are considered fast-track projects, with the first phase due for completion in 2024 and the second phase in 2025.

Power generated from both plants will be used for baseload operations until 2030.

KAPP's Al-Zour North Phase 2&3 IWPP

CLIENT: Kuwait Authority for Partnership Projects (KAPP), Kuwait

STATUS: Bids invited

The Kuwait Authority for Partnership Projects (KAPP) has invited bids for the development of its planned Al-Zour North Phase 2&3 Independent Water and Power Project (IWPP).

Last date to submit bids is 30 June, 2024.

The bidders pre-qualified to bid are:

- Abu Dhabi National Energy (Taqa) of UAE / AH Al Sagar & Brothers of Saudi Arabia / Jera of Japan
- Acwa Power of Saudi Arabia / Gulf Investment Corporation of Kuwait
- China Power International Holding / Malakoff International of Malaysia / Abdul Aziz Al Ajlani Sons and Company of Saudi Arabia
- Nebras Power of Qatar
- Sumitomo of Japan

The contract scope involves the development, financing, design, procurement, engineering, construction, testing, commissioning, operation, maintenance and transfer of the IWPP.

The project is being implemented by KAPP in collaboration with the Ministry of Electricity & Water & Renewable Energy of the State of Kuwait (MEWRE).

KAPP and MEWRE are assisted by Ernst & Young as Lead & Financial Advisor, Addleshaw Goddard as Legal Advisor and Atkins as Technical & Environmental Advisor.

The Al-Zour phase 2&3 IWPP will merge the previously planned second and third phases, and will have a generation capacity of 2,700 MW and a desalination capacity of 165 million imperial gallons a day (MIGD).

Adnoc's Ruwais LNG Project

CLIENT: Adnoc, UAE

STATUS: EPC to be awarded

Adnoc is likely to award the main engineering, procurement and construction (EPC) contract in June 2024 for its LNG project in Ruwais.

TEI reported last month that a Limited Notice to Proceed (LNTP) was awarded to a joint venture led by Technip Energies, with JGC Corporation and National Petroleum Construction Company for early EPC activities for the LNG project.

The financial investment decision is expected this year.

The FEED work was carried out by McDermott.

The project comprising two 4.8 million tons per annum (Mtpa) LNG trains is expected to increase Adnoc's LNG production capacity by 9.6 Mtpa, in order to respond to the growing global demand for natural gas.

The LNG plant will include process facilities, flare and utilities. LNG storage tanks, an export jetty — with an option for bunkering — and other associated facilities. It will be the first LNG export facility in the Middle East and North Africa region to run on clean power, making it one of the lowest carbon intensity LNG plants in the world.

The project commissioning is expected in 2027.

Iraq MoE's Salah Al Din Gas-Fired Power Plant

CLIENT: Ministry of Electricity (MoE), Iraq
STATUS: O&M contract awarded

The Ministry of Electricity of Iraq (MoE) has awarded the operation and maintenance deal to China Machinery Engineering Corporation (CMEC) for the Salah Al Din gas-fired power plant in northern Iraq.

CMEC was the engineering, procurement, and construction (EPC) contractor for the project.

The Salah Al-din power plant is currently active and comprises two generating units of 630 MW capacity each.

The project was developed by the MoE with an estimated investment of approximately £768m (\$1.189bn).

Saudi Aramco's Fadhili Gas Plant Expansion Project

CLIENT: Saudi Aramco, Saudi Arabia
STATUS: EPC packages awarded

Saudi Aramco has awarded the engineering, procurement and construction (EPC) contracts to GS Engineering & Construction Company and Nesma and Partners, respectively for the Sulphur Recovery Units and the Early Civil Works Packages for its Fadhili Gas Plant Expansion Project.

For the Sulphur Recovery Units (Package 2), GS Engineering & Construction will construct six sulphur recovery units (SRU), heavy duty oil handling, loading, unloading, and storages, wastewater treatment plant, storage tanks, and associated facilities. The plant will produce 800 tons of sulphur per day.

The project is expected to increase the plant's processing capacity from 2.5 billion to up to 4 billion standard cubic feet per day (bscfd).

This additional 1.5 bscfd of processing capacity is expected to contribute to the company's strategy to raise gas production by more than 60 per cent by 2030, compared to 2021 levels. The plant is also expected to add an additional 2,300 metric tons per day to sulphur production.

The project is expected to be completed by November 2027.

Bapco's Bahrain Non-Associated Gas Compression Project

CLIENT: Bapco Upstream W.L.L., Bahrain
STATUS: Bids invited

Bapco Upstream W.L.L. has extended the bids submission deadline for the engineering, procurement and construction (EPC) contract of non-associated gas compression facilities NCF 03-08 and CNCF.

Bids are now due to be submitted by 5 May, 2024.

The tender scope is to install 7xNAG Compression Stations around Bahrain field.

The scope will cover the stations only, the interconnecting pipelines from wells and to the receivers will be handled by another contract - in house. Each station will include the following equipment:

Feed Gas Air Cooler, Inlet Separator, Suction KOD, Compressor & Engine Driver Unit Skids, Discharge Air Cooler, Closed Drain Vessel, Closed Drain Pumps, PA, IA and N2 Package, Chemical Injection Packages, Flare package etc., associated piping, control valves, shutdown valves, F and G, etc. and required Instrumentation and electrical systems.

Iraq Inaugurates New Electrical Interconnection with Jordan

Iraq has inaugurated a new electrical interconnection with Jordan marking a significant step towards improved energy security in Al-Rutbah district in Anbar province.

The report, quoting Minister of Electricity, Ziad Ali Fadel, said the interconnection, stretching 330 kilometres (km) within Iraq and 6 km within Jordan, will provide much-needed electricity to Al-Rutbah district, which has lacked reliable power supply for 10 years after the ISIS war.

The project is being operationalized in phases, with the initial phase transmitting approximately 40 megawatts (MW) of electricity over a 132kV transmission line. The second phase will supply 150 MW upon completion of a 400kV high-voltage extension to the Qaim station.

A report said transfer capacity will ultimately reach 500 MW, benefiting a large portion of Anbar province. ■

AD Ports Group in Preliminary Deal to Develop Iraq Port, Economic Zones

Abu Dhabi-based AD Ports Group, a leading facilitator of global trade, logistics and industry, said it has entered into a preliminary agreement with the General Company for Ports of Iraq (GCPI).

Under the terms of the agreement, both parties will establish a joint venture to develop Al-Faw Grand Port and its economic zone, as well as any future expansion, said a statement from AD Ports Group.

Furthermore, the agreement also encompasses the potential investment, management, and operation of ports, economic zones, and related infrastructure in other cities in the Republic of Iraq, it stated.

The agreement was signed in the presence of Razzaq Muhaibas Al Saadawi, Iraq's Minister of Transport, and Dr. Thani bin Ahmed Al Zeyoudi, UAE's Minister of State for Foreign Trade, by Captain Mohamed Juma Al Shami-si, Managing Director & Group CEO, AD Ports Group, and Dr. Engineer Farhan Muhesen Al Fartosi, Director General of the General Company for Ports of Iraq.

This signing follows a MoU inked by the two parties in September 2021, and the subsequent addendum, signed in August 2023, to intensify cooperation.

The venture is set to bring together the expertise of both entities to attract international terminal operators, foster global trade relations, and develop commercial sea corridors, contributing to Iraq's economic growth.

The preliminary agreement aims to provide the necessary expertise for Al-Faw Port and Economic Zone, using advanced management and operating models, in addition to studying the mechanism of developing, financing, managing, operating and maintaining the project, with an aim to enhance overall efficiency and operational capabilities.

Both parties will explore investment opportunities and conduct the necessary feasibility studies related to ports, economic zones and other infrastructure under the General Company for Ports of Iraq.

Al Saadawi said: "Al Faw Grand Port and Economic Zone project is of great importance to the Iraqi government, which is committed to implementing the project in line with the highest global standards, in cooperation with our partners in the UAE

and AD Ports Group."

"We have provided all the necessary solutions to ensure the success of the project, which aims to significantly contribute to local and regional economies. Moreover, combined with the development road project, Iraq's most prominent economic and logistics development, this project will strengthen maritime transport and freight shipping between Asia and Europe," he added.

Dr Al Zeyoudi said: "The agreement signed today between AD Ports Group and the General Company for Ports of Iraq, is in line with the directives of our wise leadership towards strengthening economic ties and increasing bilateral trade volumes between the two countries, in combination with associated agreements aimed towards the establishment of mutual growth platforms for business and private sectors, through exploring cooperation opportunities that drive mutual benefit in key industries." ■

FEED on Dorra Gas Field to be Completed Soon

The front-end engineering and design (FEED) phase of the disputed Dorra gas field project will be completed in the next few months.

Kuwait and Saudi Arabia are cooperating to develop the offshore field, which was originally discovered in 1965.

The project is being executed on a fast-track basis. France's Technip Energies is doing the FEED revalidation, which could give it an advantage when it comes to the award of the engineering, procurement and construction (EPC) contract for the project.

Kuwait is looking to increase its production to more than four million barrels of oil per day (bpd) from 2.4 million bpd in February. Kuwait also plans to increase the volume of crude it processes in its refineries. The country is refining 1.4 million bpd and expects to increase that figure to 1.6

million bpd soon. ■

OQ Group Plans to Develop 5 GW Renewables Energy Projects by 2030

OQ, the global integrated energy group of the Sultanate of Oman, plans to develop a pipeline of renewable energy projects totaling in excess of 5 gigawatts (GW) of capacity by 2030.

Envisioned for implementation in multiple phases, output from these projects will support the decarbonization of Oman's oil and gas sector, as well as industrial clusters distributed around the country, the wholly state-owned group — part of Oman Investment Authority (OIA) — revealed in its 2023 Annual Report.

Significantly, the first phase of projects corresponding to around 400 MW of renewable energy capacity is anticipated to reach a Final Investment Decision (FID) before the end of this year, it said.

The group's clean energy drive is being spearheaded by OQ Alternative Energy (OQAE) as part of its mandate as a 'Renewable Energy National Champion' — a designation conferred by the Ministry of Energy and Minerals.

"In its ongoing commitment to sustainability and decarbonization, OQAE is leading OQ's efforts to build resilience into OQ's existing hydrocarbon portfolio and achieve sustainable growth through efforts on energy efficiency, clean energy and low carbon molecules (LCM) with an objective to build a non-hydrocarbon diversified portfolio with stable returns," it explained.

Listing achievements on the green hydrogen front during 2023, OQ said its Alternative Energy unit signed Project Development Agreements (PDAs) with Hydrom (the orchestrator of this sector) for legacy green ammonia export projects such as

Hyport Duqm, Green Energy Oman (GEO), and SalalaH2.

Concession blocks for each of these projects have been secured as well.

The immediate goal, it cautioned, was the need to de-risk these projects in order to progress them to the FID stage.

“The green hydrogen sector, which is part of low carbon molecules, remains a very nascent sector globally with risks in regulations and policies, technology and market.

“Therefore, throughout 2023 OQAE took an active approach by working closely with key players in the ecosystem to structure solutions and progress with developments,” the company explained.

Furthermore, OQAE has developed an opportunity pipeline in other low carbon vectors beyond green hydrogen in biogenic fuels such as e-Sustainable Aviation Fuel (SAF) and e-Methanol.■

Kuwait Among Top Crude Oil Exporting Countries

Crude oil is indeed a cornerstone of the global economy, serving as a vital raw material for various industries. Following is the list of top oil exporting countries and their significant contributions to the global oil trade:

1. Saudi Arabia — Reigning at the top of the list, Saudi Arabia exported \$236 billion worth of oil in 2022, comprising 16.2% of global oil exports. With vast reserves and substantial production capabilities, Saudi Arabia plays a pivotal role in global oil markets.

2. Russia — Following closely, Russia accounted for 9.14% of global oil exports in 2022, with a value of \$133 billion. Russia’s expansive oil industry, led by major players like Rosneft and Gazprom, contributes significantly to its export prowess.

3. Canada — Canada emerges as the third-largest oil exporter, with exports totaling \$123 billion in 2022, constituting 8.48% of global exports. The country’s rich oil sands in Alberta are a key driver of its oil production and export capacity.

4. United States — Despite being a significant consumer, the United States stands as the fourth-largest oil exporter, with exports valued at \$118 billion in 2022, representing 8.16% of global exports. The U.S. has witnessed a surge in oil production in recent years, bolstering its export capabilities.

5. Iraq — Iraq holds the position of the second-largest exporter in the Middle East, with oil revenues reaching \$111 billion in 2022, accounting for 7.62% of total exports. Despite facing challenges, Iraq’s oil reserves remain a vital asset for its economy.

6. United Arab Emirates (UAE) — The UAE exported \$105 billion worth of oil in 2022, contributing 7.24% to global oil exports. With significant reserves and production capacity, the UAE continues to play a crucial role in global oil markets.

7. Kuwait — Despite its small size, Kuwait maintains a prominent position as a major oil exporter, accounting for 4.31% of global oil exports in 2022, with exports valued at \$62.6 billion. Norway — Norway stands out as the eighth-largest oil exporter, with exports totaling \$58.9 billion in 2021. The country’s substantial reserves and strategic location contribute to its significant role in European oil markets.■

Danfoss Names Mena Climate Solutions Sales Director

Marcio Barwinski

Danfoss, a leading provider of sustainable technologies, has announced the promotion of Marcio Barwinski to the role of Climate Solutions Sales Director for the Mena region.

The Danish multinational engineering group caters to the renewable energy, such as solar and wind power, as well as district-energy infrastructure for cities.

A family-owned entity, Danfoss employs more than 42,000 people and serves customers in more than 100 countries through a global footprint of 95 factories.

On the key promotion, the company said Barwinski brings nearly 30 years of experience in the industry to this crucial role.

An industry veteran, he boasts a proven track record of success, most recently leading significant revenue growth for Danfoss Brazil's Climate Solutions business followed by a global role focused on district cooling based in the region. His deep understanding of the HVAC-R (heating, ventilation, air conditioning and refrigeration) market and strong relationships within Danfoss will be instrumental in driving further growth for the company's Climate Solutions portfolio in the region, it stated.

Lauding the promotion, Mert Kalafatoglu, Climate Solutions Senior Sales Director at Danfoss Turkey, Middle East and Africa, said: "Marcio's expertise and leadership make him the ideal choice to spearhead our Climate Solutions sales efforts in the Mena region. His career achievements perfectly align with our mission to deliver innovative solutions that reduce energy consumption and create a more sustainable future."

"We are confident that under Marcio's leadership, we will continue to expand our footprint and make a positive impact on the region's climate goals," he stated.

Danfoss recently celebrated the 20th anniversary of its Dubai office, but the Danish engineering group had a strong regional presence going back to the sixties through local partners.

Over the years, Danfoss provided solutions for the leading district cooling companies, data centre providers and other F&B, HVAC-R, marine and industry customers across the region.

Danfoss Climate Solutions Engineers energy-efficient solutions to help the world get more out of less, reduce global emissions, and mitigate climate change.

On his new role, Barwinski said: "I'm incredibly excited to take on this new role and lead the Mena Climate Solutions team at Danfoss. Together, we have a tremendous opportunity to become our customers' preferred business partner across the region, by providing the most complete range of products and solutions for the HVAC-R sector while enhancing our partners experience with Danfoss at all stages of the solution design and purchasing journey."

"Danfoss technology is a perfect match with the high standards and ambitious decarbonization goals of the regional countries," he added.

Oman Cables Appoints New Board of Directors; First Woman Chairperson

Cinzia Farisè

Oman Cables Industry (OCI), a leading cable solutions provider, has appointed a new Board of Directors led by Cinzia Farisè as the Chairperson. She is the first woman chairperson of leading a manufacturing listed company in Oman.

The appointment came at the company's Annual General Meeting that was held in mid-April. The board members cover a broad spectrum of international skills, educational background, professional qualifications, experience and expertise strengthening the robust corporate governance framework, the company said.

The new board will include Mohamed Al Lawati (Vice Chairperson), Sayyid Shabib Al Busaidi, Laura Figini, Fabrizio Rutschmann, Yasser Al Rashdi and Ian Prescott.

Cinzia Farisè has a long track record of board membership and chairmanship in various multinational companies, in addition to being a member of the Advisory Board of Sultan Qaboos University of Oman, College of Engineering. She served as the Chief Executive Officer at Oman Cables and as Regional Chief Executive Officer at Prysmian MEART (Middle East, Africa, Turkey, Russia and India), before moving to her global role as the Executive Vice President Power Grids at Prysmian Group.

The AGM also approved the financial results for 2023 with a turnover of OMR 248.17 million (\$644.75 million) and a net profit of OMR 18.93 million, marking a 69.4% increase compared to last year.

Farisè commented: "During the recent years Oman Cables has shown continued growth and a robust financial performance. The strong focus on differentiation was paying, and the significant increase in profitability is the result of a clear strategy aiming to support the ongoing energy transition, within the frame of Oman vision 2040. Our unwavering commitment is to elevate the shareholder and stakeholder value further."

Bahrain

► Tender Name	Provision of Decontamination Services for Refinery Operating Units
Country	Bahrain
Bid Bond	BD 5000
Description	<p>The Tender Board of Bahrain has invited bids for the Provision of Decontamination Services for Refinery Operating Units.</p> <p>The scope of work comprises the 100 percent Vapour Phase decontamination of Bapco Refinery Process Units or defined sections of Process units inclusive of the supply of all necessary HP pumps hoses valves and fittings etc to facilitate the injection of decontamination chemicals.</p> <p>This also includes providing all necessary decontamination chemicals and other additives provision of qualified personnel to conduct site surveys and analyses of Process Units or systems to be decontaminated to determine the type and quantities of chemicals or additives required and the injection points to perform Vapour phase decontamination And the provision of qualified technical personnel to perform all aspects of the Vapour Phase decontamination process including taking the necessary readings and checks to confirm that the process has been successful providing confirmatory documentation and readings on completion of decontamination process and preparing a comprehensive report on completion of process.</p> <p>The Client is the Bapco Refining.</p> <p>Complete tender documents can be obtained on payment of BD 100 from the e-Tendering portal at http://www.tenderboard.gov.bh.</p>
